### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,3,5,6,22,23,27-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tomita et al. US 2002/0061966.

3. The art rejections previously of record are herein withdrawn.

4. The Tomita et al patent is cited as showing thermoplastic elastomers in hot melt adhesive compositions, [0015]. The claimed amount of the component is disclosed at [0016]. Tackifiers are disclosed at [0024]. The incorporation of the ionomer resin is rendered disclosed at [0023]. The difference between the claimed invention and the cited art is the ionomer is not exemplified. Here one would have to select the ionomer resin from those resins listed in [0023]. One would be motivated to select the ionomer resin from this list given the direct suggestion to do so. As such the selection is prima facie obvious.
